

## DX-8000 Series Drop Dart Impact Tester ASTM D1709

The **Series DX-8000** Dart Impact Tester is a proven tool for closely controlling nominal and peak strength characteristics to speed your:

- Production and additives settings and adjustments
- Research and development of new film and sheet products
- Inspection of incoming film and sheet products
- In-process checks to ensure on-spec product for converting operations

### Series DX-8000 Drop Dart Impact Tester Advantages

Meets specifications of ASTM D1709 Methods A&B Standard Test Method for Free Falling Dart Impact Testing of Plastic Film.

Advanced Technical Features in Each DX-8000 Drop Dart Impact Tester Model:

- Easy, Manual or Pneumatic-assisted Operation
- Two versions of operation available: Operate as a manual system or with pneumatic-assist for dart release and film/sheet sample clamping. Pneumatic clamping and dart release is useful for laboratories with higher volume sampling requirements.
- Expandable; Flexible Operation for Method A & B Testing
- Portable and expandable with models for Method A testing, or Method A & B combination testing.
- Extensions and custom dart stems & weights available for testing to your in-house developed requirements. Affordable Best of all, the series DX-8000 is economically priced.
