

GOLD – PLATINUM – SILVER KARAT TESTER

An Ultimate Tool for Jewelry Industry, Gold & Precious Metal Research Labs, Jewelry Stores, Banks, and Pawn Shops

- Quickly, easily and accurately determine purity of precious metals and gold karat by two weighing (By measuring the Specific Gravity): one with the piece in a water tank, the other normally. An internal computer does all the calculations for you. Works only for solid metal pieces without set stones.
- No acid, needles, or test stones needed
- Leaves no scratches or stains on your gold after measurements
- Wide karat range—from 9 to 24K
- Tests other precious metals such as platinum and silver
- Also functions as a normal gram scale
- Advanced Model GK-2000 can measure up to 2,100g, which makes it possible to measure ingots and statues. Gold and Platinum measurement modes are available on GK-2000.

Gold Karat Tester Model GK-300

Precious Metal Karat Tester Model GK-2000
